

CSC-PORTAL – PICKUP NOTIFICATION PORTAL OF THE BMW GROUP.

Connected Supply Chain, 26/07/2022

INTRODUCTION.

Dear suppliers,

below you can find a description of new CSC-Portal features that will be available as of 26th of July 2022:

- When editing pick-up notifications today, the new reason code for changes "Lack of empties" can be selected.

NEW REASON CODE FOR CHANGES

MENUE ITEM: PICK-UP NOTIFICATIONS TODAY

What's new

When editing pick-up notifications, the new change reason "Lack of empties" can be selected. This change reason can be chosen when the packaging agreed with BMW is currently not available.

- Already notified
- Backlog clearance
- Call-off above agreed capacity
- CEP dimensions (Courier Express Parcel)
- Equipment availability / production program
- Exceeding weight or volume limits
- Free pick-up notification
- Insolvency
- Lack of empties**
- No transport with local forwarder
- Production problems
- Quality problems
- Raw material
- Short-term call-off change
- Special / expedite transport
- Staff shortage
- Steered transport, several tours
- Stock differences
- wrong goods supplier

REVIEW – IMPORTANT FEATURES OF PRECEDING RELEASES

Furthermore the following features have already been available for some time. You can find descriptions for these again on the following pages:

- In “pick up notification today” , you can directly select items and transfer them to a “free pick-up notification”. This simplifies the notification of quantities that exceed one truck.
- Adjustment of the height calculation for containers that sink into each other. For this purpose, the sinking depth of the containers is maintained in a table by BMW. Please report such containers to Deloitte Control Tower with a request to maintain the sinking depth.
- The creation of packing instructions is now possible for four-digit plant codes, so that, for example a different packing instruction can be stored for the plant Dingolfing and for the spare parts warehouse.
- The creation of packing instructions is now possible for materials without change index (AI).
- Restriction of changing the reference ID/shipment number after sending the advice note (see pick-up notification today and free pick-up notification).
- Error message when sending pick-up notifications with "dummy" volume.
- From now on, a reason must be entered for free pick-ups. Also an additional remark can be entered. This is also displayed under search pick-up notification.
- The traffic light for “material master data” is yellow in the free pick-up notification entry as long as no number of pieces is entered. If it remains yellow even after entering the quantity or in the advice suggestions, the part weight is 0kg and must be corrected by the supplier.
- Material number suppliers can also carry out notifications for external partners (e.g. logistics service providers) and diverging goods suppliers. Please contact Deloitte Control Tower in those instances.
- Your forwarder can also open an advice for an update on the collection day (day B) as long as there exists no ASN or IFTSTA (Track&Trace message of the TSP) yet.
- You can add more items in pick-up notifications today using the new plus icon (e.g. in case of backlog).

REVIEW – IMPORTANT FEATURES OF PRECEDING RELEASES

Furthermore the following features have already been available for some time. You can find descriptions for these again on the following pages:

- Maintenance of closing days for additional assigned supplier numbers/ delivery locations (exception: external logistics service providers).
- Possibility to copy & paste reason for change in pick-up notifications today for several/ all positions.
- Adjustment of the check for CEP shipments for international transports: Consideration of the volume weight.
- New app: “Call-off update after cut-of”.
- Missing material master data: also material numbers with part weight of 0 kg are listed.
- Adjusted error message when jumping to the “free pick-up notification from “search pick-up notif. pos.” for already completed delivery call-offs and filter option according to completed delivery call-offs.
- In “free pick-up” it is now possible to adjust the “pick up quantity” in “meters” via drop-down.
- It is now not possible anymore to change the following positions after the free pick-up has been sent out once: plant, delivery deck, supplier.
- Maintenance of closing days for additional allocated supplier numbers / pickup locations (Exemption: external logistic service providers).
- Possibility to apply the same reason for changes in pick up notifications for multiple / all positions.
- Adaption of validation for Courier/Express/Parcel deliverables in international shipments: Consideration of chargeable weight.
- In “pick-up notification today” and in “search call-offs” there is now the column "Backlog", which also displays this.
- In the Excel download under “pick-up notification today” and “free pick-up notification”, the information regarding thermo and number+type of packing aids is now also displayed.
- Manually maintained data in the material master can now be deleted by the supplier and the original data from BMW will be used again.
- Free pick up notifications which have been send but also have been deleted at a later stage will get a clear visible status that indicates that activity

REVIEW – IMPORTANT FEATURES OF PRECEDING RELEASES

Furthermore the following features have already been available for some time. You can find descriptions for these again on the following pages:

- The menu item “search call of position” there are now the columns the following columns visible: transport area, transportation network, forwarder name, supplier ZIP, supplier city, planned volume.
- Correction of stacking factor calculation for containers which sink into one another (e.g. grid box).
- Transmission of supplier references to the transport service provider also in case of updates.
- Free pick up notification are conveyable even in case weight and dimension limits are exceeded. The supplier has the responsibility to confirm feasibility of transportation.
- If the packaging Data is missing or not correct in a free pick up notification, the height of the container will be blank from now on.
- In menu item “Days off” it is now possible to maintain entire periods conveniently with only a few clicks.

03/05/2022	Tag der Arbeit (2. Tag)
03/05/2022	Tag der Arbeit (Ersatztermin)
04/05/2022	Fest des Fastenbrechens (2. Tag) (vorläufiges Datum)
04/05/2022	Unabhängigkeitstag Lettland

What's new?

In menu item "Days off" under the "Master data" tab, it is now possible to enter entire periods as closing days. Of course, it is still possible to maintain closing days individually.

Steps to take:

- 1 Open app „Days off“ under tab „Master data“.
- 2 Set check mark in front of empty or filled closing day line.
- 3 In "Select action" dropdown, select "Create days off area".
- 4 A new input mask opens. Enter desired name and period (date from-to) and confirm with "OK".

- In case the packaging data is missing the height of the container can not be calculated in a correctly. Due to that the box of the container height will be empty.
→ Due to the missing height the avis can not be send. The missing height will be shown as a mistake. The supplier need to fill out the height, afterwards the avis can be send. This rule remains for a free pick up notification as well as for pick up notifications today.
- The supplier will be notified if the avis can not be send due to the missing data.

IN “PICK UP NOTIFICATION” AND “CALL-OFFS” IT IS NOW POSSIBLE TO SEE THE CURRENT BACKLOG IN A NEW COLUMN CALLED “BACKLOG”.

 The notification weight of the shipment is less than 31.5kg and therefore a CEP-Shipment. Referring to the BMW-Shipping Instructions, domestic Shipments (within Germany or within UK) until 31.5kg Actual Weight and international shipments until 31.5kg Chargeable Weight have to be notified at the CEP-Service Provider. Do you really want to continue with this Transport Mode?

Ok Cancel

→ CALCULATION OF CHARGEABLE WEIGHT; IN CASE OF INTERNATIONAL DELIVERIES THERE WILL BE AN INDICATION IF THE NET WEIGHT IS < 31,5KG AND THE NET DIMENSION IS < 0,189 M³.

Call-Off Update after cut-c

1. Pick up notifications today are calculated at 6am.
2. Call-Off Updates are available after 6am and call-offs might include a position that should have been notified.
3. The app is a information for the supplier who has to conduct free pick ups notifications after assessment of these positions.

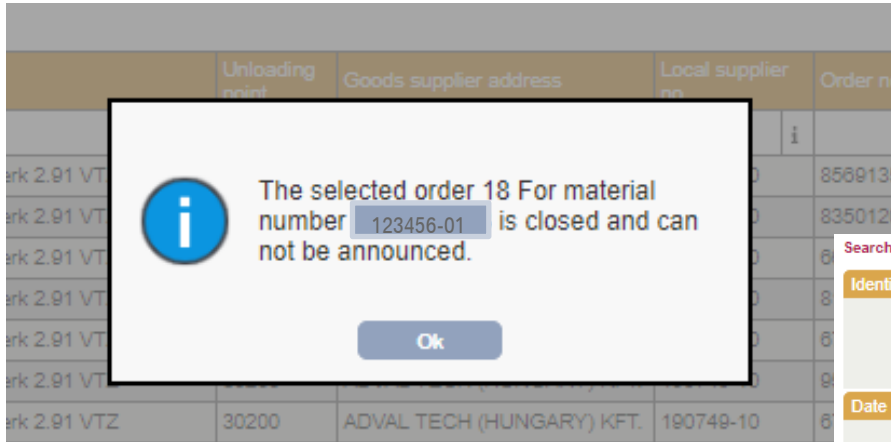

MISSING MATERIAL MASTER DATA INFORMATION: MATERIAL NUMBERS WITH EXISTING MATERIAL-WEIGHT OF 0 KG ARE LISTED.

The screenshot shows the SAP Search call-offs interface. A modal dialog titled "Edit material master data for 020 - BMW AG plant Dingolfing; vehicle plants, technologies, replacement Wallersdorf" is open. The dialog contains fields for Material number, Material number supplier, Name, Usage Type (set to "11 Production"), Country of origin, and Preferential status. The "Weight" field is highlighted with a red box and contains the value "0.00000 kg". Below the dialog, a table lists call-off items with columns for Material number, Material number supplier, Description material number, BMW plant, Plant name, Call-off no., Call-off no., Call-off date, Call-off date (old), Transportation network, Buyer email, Material master data, and Packaging specification. The "Material master data" column is highlighted with a red box, showing status indicators for each item.

→ FOR BETTER VISIBILITY, WHICH CALL-OFFS ARE NOT POSSIBLE TO CHANGE INTO FREE PICK UP NOTIFICATIONS THE MATERIAL NUMBER APPEARS WITHIN THE ERROR MESSAGE AND THE STATUS WILL CHANGE INTO „CLOSED“ IN SEARCH CALL-OFFS. THE POSITION HAS TO BE ENTERED MANUALLY IN THE FREE PICK UP NOTIFICATION.

REVIEW – IMPORTANT FEATURES OF RELEASES 3, 4A AND 4B.

Furthermore the following features have already been available for some time. You can find descriptions for these again on the following pages:

- Pickup notices today: you can select positions and directly open these in free pickup. This feature makes it easier to advice quantities which exceed the volume of one truck.
- Adjustments of calculating the height of containers which sink into each other. A table will be filled from BMW for known containers. Please inform the Deloitte Control Tower if a container needs to be added to the table.
- Packing information can be entered for plant codes with four digits, so from now on you are able to enter different packing information for series plant Dingolfing and after sales.
- Packing information can be entered for material without development index (AI).
- No change of the reference-ID/shipment number is possible after the pickup notification has been sent (in pickup notices today or free pickup).
- Error message when sending a pickup notification with „dummy“-volumes.
- Free pickup notification: a reason needs to be entered from now on to reduce requests. The reasons are displayed in Search Shipments.
- The signal for material master data is displayed yellow as long as no pickup quantity is entered in free pickup. If the signal stays yellow even after entering a quantity or if it is yellow in pickup notifications today, the weight is 0 kg and needs to be edited by the supplier.
- Vendors can now advice pickups for their external partners (e.g. logistics service provider) stated as goods supplier / pickup address.
- Your transport service provider/ carrier can now open a pickup notification on pickup day (day B) as long as no ASN or IFTSTA (track & trace message from the TSP) has been sent.
- You can add new positions in pickup notifications today (e.g. backlog clearance).

REOPENING OF PICKUP NOTIFICATION ON PICKUP DAY (DAY B) – TSP REOPENS NOTIFICATION.

1. TSP/ CARRIER REOPENS PICKUP NOTIFICATION.

The screenshot shows the BMW Group TSP interface. At the top, a red-bordered notification box contains an information icon and the text: "The reopen of the pickup notice was successful." Below this, the interface includes a search bar, a sidebar with navigation options, and a main content area with various filters and a table of shipment data.

Notification: The reopen of the pickup notice was successful.

Table of Shipment Data:
